## Installation. Calibration. Rapid Breakdown Response **The best in the industry.**

Gemco Service has the nation covered. If you need your garage equipment maintained, calibrated or require a rapid breakdown response we have an experienced and trained engineer near you!

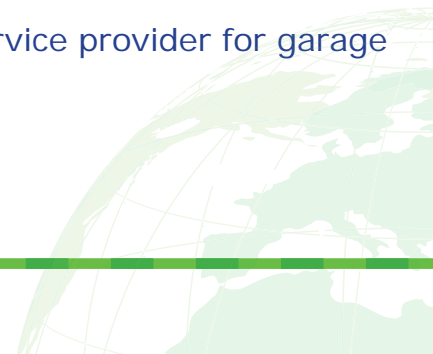

By contacting our national call centre we ensure that you receive the best and fastest response within the industry. We 'guarantee' that scheduled maintenance and calibrations visits are completed on-time and urgent breakdowns are responded to within 24 hours from our engineers.

Our engineers are trained to call ahead before every site visit so you know exactly when we are going to arrive.

No company is better equipped. We have over £1.3m of spare parts available for next day delivery which enables us to offer the best service and minimal amount of downtime on equipment breakdowns, particularly on market leading brands.

And we also value feedback from our customers. We provide courtesy calls to contracted customers and offer a price promise on 'like-for-like' quotations.

Contact us today for the best and competitive service provider for garage equipment anywhere in the UK.

Wide range of products and services provided  
**All available from one national service provider.**

We maintain, service, install and calibrate a wide range of garage equipment including:

- |                       |                        |
|-----------------------|------------------------|
| Vehicle Lifts         | Oil Equipment          |
| Gas Analysers         | Torque Wrenches        |
| Smoke Testers         | Tyre Pressure Gauges   |
| Brake Testers         | Micrometers            |
| Headlamp Aligners     | Pressure/Vacuum Gauges |
| Jacking Beams         | Trolley Jacks          |
| Air Compressors       | Bottle Jacks           |
| Tyre Changers         | Pit Jacks              |
| Wheel Balancers       | Wheel Trolleys         |
| Exhaust Extraction    | Transmission Jacks     |
| Lubrication Equipment | PAT Testing            |

All service engineers are trained through our own City & Guilds training facility and know all the latest technology to give you total piece of mind.

## Reputation. Reputation. Reputation. That's why we are the Nation's No 1.

We provide installation, warranty and training services for most leading garage equipment brands.

We are there for the independent garage owners and national companies offering a unique facility. Regardless of the size of your business you will always get the best service available.

We carry out over 90,000 **guaranteed** maintenance checks (includes calibration and inspection) and 21,000 **rapid** breakdown responses across 12,000 customer locations per year – NATIONALLY. And we get it right. That's why we are the nation's No. 1.

## The safest of safe hands We keep you Legal, Safe and Productive.

### LEGAL

If you are an MOT station your emission testing equipment must be calibrated to UKAS standard so that you can continue MOT testing. All service engineers are trained and accredited through our UKAS approved laboratory. We take full responsibility for your equipment leaving you to manage your own business without the worry of meeting legislative standards.

### SAFE

All garage equipment must meet the requirements of the Health & Safety at Work Act, which is designed to keep you, your staff and your customers safe. We can inspect, maintain and advise on both LOLER and POWER legislations. You are definitely in the safest of safe hands with Gemco!

### PRODUCTIVE

Productivity is critical to customer satisfaction and your profitability. Gemco preventative maintenance cover helps minimise unexpected and costly breakdowns.

## Support Packages

**All based on the needs of our customers.**

### Preventative Maintenance

Prevention is always better than cure. We have different types of cover from standard to fully inclusive (includes parts & labour breakdown costs), all designed to keep breakdowns to a minimum and your profits to a maximum.

### Thorough Examination

This cover takes preventative maintenance to the next level as it incorporates a 'Thorough Inspection' by our competent and experienced engineers allowing you to comply with:

*Regulations 9 of LOLER: 1998 (Vehicle Lifts)*

*Pressure Systems Safety Regulations: 2000 (Compressors)*

### Calibration

MOT equipment needs to be calibrated to allow you to continue testing. Our trained and accredited engineers ensure that you are kept legal.

### Breakdown Repairs

Minimum downtime. Maximum profit for you. If you have a breakdown we have a skilled engineer not far away who can help, and with a centralised UK call centre you only need to use one telephone number.

### Equipment Operator Training

Do you want some piece of mind that your employees are adequately trained to operate your equipment safely and correctly to help reduce unnecessary breakdowns.

### New Equipment Advice

Need some equipment? Not sure what you want? Ask the experts - Gemco. We are more than happy to help you make sure your next purchase is the right one!

## On-Site Small Tools Calibration For the total garage workshop solution.

### Quality

Quality is paramount in the services we provide to you and our market leading on-site calibration service is no exception. We can offer comprehensive portable lifting equipment inspection and small tool calibration service through our national network of mobile engineers. An essential part of this service is managing your equipment on our bespoke calibration database. Our system allows us to notify you of the planned visit in advance and ensures that your calibrations are completed on time – every time. Updated certificates are issued giving you total piece of mind.

### Safety

Accurate and regular calibrations ensure that your critical measurement tools are maintained to the highest standards. Essential for safety critical items such as torque wrenches used for tightening wheel nuts, tyre pressure gauges and brake/engine service tools. Portable lifting equipment such as jacks and axle stands also require maintenance, our LOLER trained engineers are certified to inspect and test to the highest industry standards.

### Traceability

All certification that we provide you with is fully traceable to national standards and satisfies the requirements of ISO9001, PAS125 and vehicle manufacturers standards.

### Replacement

Our engineers are able to offer replacement tools and equipment whilst on-site from their well equipped vans. Additionally, a wide range of portable lifting equipment and tools can be supplied via our offices.
