

**HEAVY DUTY 1500kg / m<sup>2</sup>**

# GEMCO PIT COVERS

**Sliding cover safety system for all types of pits**

**Reduces the risk of accidents and falls**

**A simple way to increase floor space in your workshop**

**Custom made for new and existing installations**

# GEMCO PIT COVERS

Gemco pit covers are what makes service and ATF pits safe working areas. The pit covers are available as either manual or pneumatic (air) operated. Installation takes less than a day and no building works are required which means no additional costs. What's more is that our covers are available for new or existing pits!

- Load bearing staves (1500kg/m<sup>2</sup> CERTIFIED) are produced with extruded aluminum which is anodised ensuring quality and durability
- Steel mesh chains and bearings operate movement of the cover system
- Available as one single piece or tandem installation
- Functions are carried out on the control box on air operated models
- This system is affordable, easy to use and manufactured with high quality materials
- Increase your floor space, whilst improving safety
- The air operated version does not use electricity and is therefore suitable for petroleum regulation workshops (PET REGS)
- Separate pit bridges are also available and are of the same construction to the safety covers

**A simple way to increase floor space in your workshop!**
