

# GREAT DEALS ON HPC AIR COMPRESSORS

## HPC SM15 SCB / SM15RM SCB 9kW Air Compressors - 53 cfm @ 7.5 bar - 44.5 cfm @ 10 bar

### (Main Dealerships).

The SM15 series' intelligent design enables installation in environments where space is at a premium and is maintenance friendly. The left housing cover is easily removed to allow excellent component accessibility and furthermore, the convenient inspection windows eliminate the need to remove the housing cover to check fluid levels or drive belt tension. This model is suited for main dealerships with 20 bays + MOT or commercial vehicle workshops. The SM15 Series consists of 3 different models;

### SM15 SCB – 9kW

### SM15RM SCB – 9kW (Receiver Mounted).

SM15T SCB Compressor, 250 litre Galvanised VAR

## SPECIAL PACKAGE OFFERS AVAILABLE!

### Features & Benefits

- High efficiency EFF1 electric motor consumes less power for greater output that meets or exceeds the energy efficiency criteria required to be eligible for Enhanced Capital Allowances (ECA's).
- SIGMA Profile airend provides a large volume of air for less power consumption.
- Filter mats protect the cooler from clogging from contaminants in the ambient air being drawn into the compressor. Low noise levels from just 64dB(A).
- Receiver mounted options (RM) for ease of installation and an ideal space saving device.
- The SIGMA Control automatically regulates & monitors the compressor.
- The highly efficient cooling system uses an innovative dual-flow fan that not only ensures exceptional performance but which also keeps sound emissions to a minimum.
- Variable speed control (SFC) adjusts for varying air demands and constantly monitors system pressure providing further energy savings.
