

*Lifting Britain since 1896*

**H2401/3G & H2401/3HG 4.0 Tonne Two Post Electro Hydraulic Lifts**

**Product Description**

The H24 series of Bradbury twin-ram two post lifts are fully baseless with over head gantries making them ideal for moving transmission jacks and oil drainers beneath the vehicle. With a low pad height of just 95mm these lifts are suitable for most makes and models of cars and small vans.

Two models of the H24 series are available; H2401/3G – Gantry height of 3800mm (drive under clearance) H2401/3HG – Gantry height of 4200mm (drive under clearance) – longer front arms vs. standard G version. Available in both single and three phase. Baseframe version (without over head gantry) also available.

Lifting capacity	4 tonnes
Lifting/Lowering time	50 seconds/40 seconds
Minimum height	95mm - 135mm
Maximum height	1900mm - 1935mm
Front arm length	602mm - 1077mm (G) 931mm - 1451mm (HG)
Rear arm length	931mm - 1451mm (both models - G & HG)
Motor size 1 phase	1.5kW
Motor size 3 phase	1.85kW
Drive through width	2858mm

**Key Features**

- 4.0 tonne
- Hydraulic lifting operation
- Fully Baseless
- Three phase or Single phase
- Symmetrical multi-purpose lift
- 2 Year Warranty (subject to maintenance and terms and conditions - see [www.gemco.co.uk](http://www.gemco.co.uk))
