

### WC5401L Bradbury Leverless Tyre Changer (3 Phase)

The Bradbury WC5401L Leverless Tyre Changer Machine (3 Phase) is suitable for wheels up to 24" (clamping on the outside) or 26" (clamping on the inside). An air operated, patented leverless head means that the user does not require a traditional tyre lever.

This tyre machine is fitted with an assist arm (also known as a third arm) to aid the user with changing low profile and run flat tyres. (WCAA optional extra)

All Bradbury tyre machines are built up and tested in our UK facility prior to being sent out.
